

## ✓ Details

---

### **CAPABILITIES:**

- Well suited to both small-hole drilling and micro-fine milling due to its “super hybrid concept” design
- Delivers high-speed, high-precision machining with greater stability due to its high-rigidity structure
- Wide speed range (3,000 through 40,000 RPM) via an oil-mist lubricated spindle and a long-life AC motor

### **COMPONENTS:**

- High-rigidity HSK-E25 tool holders
- Z axis balance cylinder

### **USER INTERFACE:**

- Fanuc 31i-B5 super high-speed processor with AI Contour Control II and NANO interpolation
